ETL

PROFILE

Dedicated and results-driven Data Analyst with a strong background in data analysis and a proven track record of bringing ideas and projects related to technology and sustainability to life. Adept at receiving and monitoring data from multiple data streams, including Pentaho, Python, APIs and SQL data sources.

Skilled in data analysis and visualization with Power BI and Python, with a keen eye for detail and a passion for making a positive impact. Committed to continuous learning and excited about the opportunity to contribute to a dynamic data-driven environment. My ambition is to leave a lasting, positive impact on the world through my work in data analysis and technology.

EMPLOYMENT HISTORY

Data Analyst at Cassol Pré-Fabricados, Araucária

October 2023 — Present

Responsible for analyzing and interpreting data to generate value for decision-making. One of my main tasks was developing a data lake using technologies such as Pentaho, Python, PostgreSQL, MySQL, PL/SQL, REST APIs, and Power BI. Additionally, I perform data collection, cleaning, and analysis to provide strategic insights. I collaborate with various teams to identify patterns and opportunities for process optimization and improvements. I also create interactive dashboards and reports in Power BI and data apps, making data interpretation easier and supporting decision-making.

IT Analyst at PMC, Curitiba

November 2020 — November 2023

I developed and optimized SQL queries for data analysis. I created dashboards in Power BI to track and visualize KPIs. I implemented automation solutions using shell script, RPA, and Python. I also participated in the development of an in-house system and was responsible for the implementation of new clients, including data migration tasks. I provided technical support to internal users, including repairs on computers and laptops. I managed the Office suite, email servers, database systems, and backup systems. Additionally, I maintained and documented internal processes and infrastructure.

IT Technician at Infoquality, Curitiba

April 2019 — November 2020

I performed maintenance on computers, smartphones, printers, and electronic equipment. I diagnosed and repaired system issues, including hardware replacement and repairs on electronic components. I provided exceptional customer service, engaged in product sales, managed inventory, and supervised a cybercafe.

EDUCATION

Graduate course - Data Analyst, Descomplica, Remote

January 2023 — February 2024

I underwent comprehensive training in advanced data analysis techniques, including machine learning and statistical modeling, with a focus on practical applications such as data visualization, database management, and automation using languages like Python and R.

Graduation - Technologist in System Analysis, UNINTER, Curitiba

January 2020 — June 2023

I have a deep understanding of emerging technologies and their impact on business operations. This encompasses areas such as data analysis, cybersecurity, cloud computing, and digital transformation strategies. I have practical experience with technological tools and methodologies, enabling me to analyze and implement innovative technological solutions for organizations.
